

Joint Membership

SF2M-ASM International - The Materials Information Society (US)

Chers Collègues,

Depuis 2004 les membres SF2M ont la possibilité de bénéficier des avantages offerts par la société ASM, sous forme de "e-membership", dans des conditions très avantageuses. Cette société, grâce à son investissement intellectuel financé par un grand nombre de membres depuis des décennies, peut offrir des services que les sociétés européennes, trop morcelées n'ont pu développer.

Nous vous encourageons vivement à vous abonner : versement de 30 Euros (tarif 2017) à l'ordre de la SF2M, reversés à ASM.

Joint Electronic Membership with ASM International – The Materials Information Society (US)

SF2M members may choose to become **SF2M/ASM Joint Members for a fee of 30 Euros**. This represents a significant discount compared to the regular ASM membership dues of US\$122 per year.

SF2M/ASM Joint Members will receive online access to sections of the ASM web site (<http://www.asminternational.org>), available exclusively to ASM members and SF2M/ASM joint members, **unlimited access to:**

online reference collections

- **ASM Metals Handbook Desk Edition Online and**
- **Engineered Materials Handbook Online,**

articles published in ASM's magazines

- **Advanced Materials & Processes and**
- **Heat Treating Progress.**

These are communication tools for convenient networking with other ASM members, and additional benefits.

SF2M/ASM Joint Members are also entitled to exclusive ASM member discounts via web, phone, fax and mail transactions on ASM books, online reference collections, journals, conferences and seminars.

Participation of SF2M/ASM Joint Members in ASM technical programs, committees and the ASM awards program is encouraged.

“We believe that offering this joint membership option gives our SF2M members an important point of contact with the North American materials community, while providing useful benefits from a respected source of information on metals and engineered materials,” an SF2M spokesperson said.

Known as American Society for Metals prior to 1984, **ASM** is a leading international materials society with more than **33,000 members** and **200 chapters worldwide**. ASM is best known as the publisher of the ASM Handbook series, industry's leading informational reference collection on metals, alloys and processes.
