

Invitation to the German-French symposium
on Texture Analysis using Neutrons and Photons
of the joint committees of DGM-SF2M
05.04.2013 at DESY-Hamburg

The Symposium is dealing with all kinds of investigations related to neutron and photon research. Due to the application of area detectors complete and partial diffraction pattern deliver the whole information of Bragg-reflections simultaneously, so that the option of combined investigations are excellent.

We would like to ask for contributions in the field of neutrons, photons, usage of area detectors, in situ analysis, data treatment, combined analysis and of course new visions how to improve neutron and photon methods.
